

## Toolkit 6: DATA LEADERSHIP

# 'Interim' CDO & delivery office – driving execution & embedding change

*Building the muscle to deliver, sustain, and scale your data and AI strategy*

### WHAT YOU GET

A dedicated, embedded leadership function — part 'interim' Chief Data Officer, part project management office — designed to convert strategy into execution, and execution into results.

### WHY IT MATTERS

Data initiatives fail not from poor design, but poor delivery.

By anchoring delivery in business outcomes — with clear ownership, communication, and feedback loops — we ensure the benefits of data and AI are realised, not just proposed.

### IDEAL FOR

Businesses without internal data leadership or delivery structure

PE-backed companies delivering multi-phase transformation  
OR  
Wanting to do more with data & AI but don't know how

PE sponsors wanting accountability and visibility on impact

### WORKING WITH US

We act like your interim leadership and delivery engine — owning progress, supporting your team, and ensuring results are sustained. Once embedded, we help you transition to a self-sufficient model.

### LET'S TALK

*Build the structure that makes your data & AI strategy stick*
