# data:diligence

Toolkit 1: PLATFORM

Unlock scalable insights & EBITDA growth with a modern data foundation

Establishing the right data infrastructure for future value creation

1. **INGEST**
2. **STORE**
3. **PROCESS**
4. **SERVE**
5. **MONITOR & GOVERN**

WHAT YOU GET

A pragmatic data infrastructure that connects your ERP, CRM, HR, and budgeting data into a single, scalable, AI-ready platform — tailored to your existing systems and future ambitions.

Example

WHY IT MATTERS

Without robust data foundations, even the best strategies fail.

Many mid-cap firms rely on fragmented spreadsheets and siloed systems. The right data platform decouples reporting from operations, providing the core infrastructure to scale analytics, reduce risk, and unlock long-term value.

WHAT IT DELIVERS

➢ **Faster decisions** through centralised, self-serve data

➢ **Scalable AI and BI** without starting from scratch

➢ **Single source of truth** to support integration, reporting, and audit

➢ **Future-proofed systems** that support M&A growth and innovation

IDEAL FOR

Businesses integrating multiple (legacy) systems

Finance & operations teams needing visibility across entities & business units

PE-backed firms preparing for value realisation and exit

WORKING WITH US

We typically act like an interim Chief Data Officer—guiding your teams, scaling to your needs, and ensuring your data investments deliver real-world business results. Whether you need an enterprise-grade solution or support for an internal team, we blend strategic insight with hands-on delivery.

LET'S TALK

Discover how we can get you AI-ready, faster.
